HexaDeals Website Specifications

Brief

Hexadeals.com is a wordpress website based on the Couponhut theme (purchased from themeforest). The main aim of our website is to provide customers with printable coupons that the customers can take to the store to get discounts. Users can register into our website as a company where they can post deals and offers or just as customers where they can browse and get coupons. We are looking to fix/add the following features to our website.
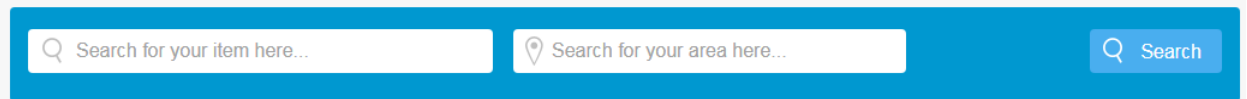

1. Verify valid email domain before registration of customer.

Currently on the website any domain can be registered even if the email doesn't exist. Our website should be able to detect if the email doesn't exist and shows a message saying: "Please insert a valid email address".

## 2. Add cities for the deals locations and the search bar

We want to add cities of Oman to each deal posted. The user browsing our website by default view all the deals in Oman. However, the user has the option to select a certain city from dropdown menu for which the relevant deals will only be viewed.

This should be located on the home page only at the top, below the Menu bar.

The user should be able to select the deal location, as follows:

Note: As **Website Administrators** we want to be able to add or delete a location.

List of cities that should be added is as following categorized by Provinces:

    a.   Muscat
- i. Al Amarat
- ii. Muscat
- iii. Bawshar
- iv. Muttrah
- v. Qurayyat
- vi. Al Seeb

    b.   Al Dakhiliya
- i. Nizwa
- ii. Sumail
- iii. Bahla
- iv. Adam
- v. Al Hamra
- vi. Manah
- vii. Izki
- viii. Bid Bid

    c.   Al Batinah North
- i. Sohar
- ii. Shinas
- iii. Liwa
- iv. Saham
- v. Al Khaboura
- vi. Suwaiq

    d.   Al Batinah South
- i. Rustaq

    ii.   Al Awabi
   iii.   Nakhal
   iv.   Wadi Al Maawil
    v.   Barka
   vi.   Al Musannah

       e.   Al Buraimi

     i.   Al Sinainah
    ii.   Al Buraimi
   iii.   Mahdhah

       f.   Al Dhahirah

     i.   Dhank
    ii.   Ibri
   iii.   Yunqul

       g.   Al Wusta

     i.   Al Duqum
    ii.   Al Jazur
   iii.   Haima
   iv.   Mahut

       h.   Dhofar

     i.   Al Mazyona
    ii.   Dhalkut

   ix.   Taqah
    x.   Thumrait

       i.   Musandam

     i.   Bukha
    ii.   Dibba
   iii.   Khasab
   iv.   Madha

       j.   Al Sharqiya

     i.   Al Mudaibi
    ii.   Al Qabil
   iii.   Bidiya
   iv.   Dima and Al Taaiyin
    v.   Ibra
   vi.   Ja'alan Bani Bu Ali
  vii.   Masira
 viii.   Sur
   ix.   Wadi Bani Khalid

3. Every Coupon should have a unique code (generated by the website)

The code should be in the form of numbers and QR code. We need this to be displayed in the coupon printed format.

4. Coupon printable auto-generated template that includes:

k. Website Log (HexaDeals.com)
l. Company Name
m. Expiration Date
n. Coupon Details.
o. Company Location.
p. Coupon Code.
q. Customer Name.
r. Customer Phone Number

The following is an example of what the coupon should contain. The design layout features of the coupon should be done by the developer. (The logo will be provided later by us)

Coupon Code: AXA-1234555

heaxDeals Logo

Company Name: Pizza Hut

Location: Muscat

Deal Details: 25% OFF

Deal End Dates: 20-Jan-2018

Customer Name: Zak

Customer Phone Number: 92559711

5. *Limited Coupons* option that requires customer name, phone number and a valid email address prior to redeem during the checkout of the coupon.

NOTE: any user can obtain any coupon without registering. If the user is registered then his details should automatically be added to the coupon and no need for putting them.

There are two types of coupons

i. **Unlimited Deals:** This can be get simply and doesn't require an email validation. However, it will still ask for the customer name and phone number.

ii. **Limited Deals:** This requires the customer to enter a valid email address prior to getting the coupon and hence limits one coupon per email only for this deal. However, the user can still buy other limited deals.

6. Reviews fixing the issue.

The website star reviewing is not working properly at the moment. It doesn't allow more than one user to rate the deal. We need this to be fixed.

7. List of our Customers: Names, Emails, Phone Numbers.

The website should be able to provide the administrator with a full list of customers details. This is for both the companies that offers the deals and for the customers.
The list will later be used by the administrators for sending promotion emails and for other marketing services and analysis.

8. Archive Expired Deals and remove them automatically from the display.

Currently the website labels the expired deals as expired but still present them in the display. We want the expired deals to be removed from the display when they expire, however, we still want to them to be archived in the website so we can review them later.
